Summary Table
Voluntary Product Accessibility Template

Criteria	Supporting Features	Remarks and explanations
Section 1194.21 Software Applications and Operating Systems	Supported. Please refer to the attached VPAT.	
Section 1194.22 Web-based internet information and applications		SQL Delta is not considered a Web-based product according to the definition in 1194.22
Section 1194.23 Telecommunications Products		SQL Delta is not considered a telecommunications product according to the definition in 1194.23.
Section 1194.24 Video and Multi-media Products		SQL Delta does not use multimedia except as covered in section 1194.21.
Section 1194.25 Self-Contained, Closed Products		SQL Delta is not a self-contained product according to the definition in Section 1194.25.
Section 1194.26 Desktop and Portable Computers		SQL Delta is software as defined under section 1194.21.
Section 1194.31 Functional Performance Criteria	Supported. Please refer to the attached VPAT.	
Section 1194.41 (a) Information, Documentation and Support	Supported. Please refer to the attached VPAT.	

**Section 1194.21 Software Applications and Operating Systems - Detail
Voluntary Product Accessibility Template**

Criteria	Supporting Features	Remarks and explanations
<p>(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.</p>	<p>Supported: SQL Delta supports Windows® accessibility features including StickyKeys, FilterKeys, MouseKeys, SerialKeys, and ToggleKeys.</p> <p>Keyboard access is provided in a number of areas throughout SQL Delta. Keyboard shortcuts, shortcut keys, and menu commands are available in SQL Delta.</p>	
<p>(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.</p>	<p>Supported:</p>	
<p>(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.</p>	<p>Supported with exceptions:</p>	<p>SQL Delta generally supports on-screen indication of current focus however each user should evaluate SQL Delta for support with their specific Assistive Technology.</p>
<p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information</p>	<p>Supported with exceptions:</p>	<p>SQL Delta provides limited support displaying some status elements as icons with corresponding hints however some Assistive Technologies may not recognize the hints.</p>

conveyed by the image must also be available in text.		
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supported:	
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supported:	
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Limited Support with exceptions: SQL Delta provides minimal support for large fonts and high contrast.	The primary TAB display of SQL Delta does not support high contrast.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Supported:	
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supported:	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Not Supported: SQL Delta does not support color changes.	
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supported:	
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and	Supported with exceptions	Some information is available to Assistive technology however direction and cues information is not available.

submission of the form, including all directions and cues.
